Information on the financial service offered

Tramondo provides its clients upon request with transaction-related investment advisory services or portfolio-related asset management services or prepares a consolidated asset overview.

In a transaction-based investment advisory mandate with Tramondo, clients receive a personal recommendation relating to individual financial instruments. However, the decision to buy or sell ultimately remains with the client.

A portfolio-related asset management contract is understood to be the management of a total of the client's assets. The client delegates the decision on the investments to Tramondo (based on a limited power of attorney), whereby the decision is made in accordance with the agreed investment strategy.

For detailed information on the essential rights and obligations arising from an investment advisory or asset management contract, we refer to the relevant contracts between Tramondo and its clients.

The investment funds Tramondo Dynamic Equity Opportunities Fund, Tramondo GreyJung Global Opportunities Fund, Tramondo Defensive Income Fund, Tramondo Generation Fund and Tramondo Credit Opportunities Fund are also available to complement other mandates. For information on the general risks, characteristics and functioning of the investment funds, we provide you with the corresponding prospectuses.

Client segmentation

Financial service providers allocate their customers to a legally prescribed segment. According to art. 4 of the Financial Services Act, a client can be classified as a private client, professional client or institutional client. Based on FinSA art. 4 para. 7, Tramondo treats all its clients as private clients and thus grants them the highest possible investor protection.

Information on risks and costs

General risks in trading with financial instruments

The investment advisory and asset management services entail financial risks. Tramondo provides all clients with a brochure entitled "Risks in Trading with Financial Instruments" before conclusion of the contract.

Risks in connection with the service offered

For a presentation of the risks that may result from the investment strategy for client assets, we refer to the corresponding appendices to the asset management agreement.

For investment advice, Tramondo provides its private clients with the basic information sheet of the financial instrument in question.

Information on costs

A fee is charged for the services rendered, which is calculated on the assets under management or on a performance basis. For more detailed information, please read our Investment Advisory or Asset Management Agreement.

Information about conflicts of interest

In connection with the financial services offered by Tramondo there are no economic ties to third parties. Tramondo does not accept any retrocession payments and maintains its independence in this context.

Information on the market offer and selection of financial instruments

Tramondo follows an "open universe approach" and tries to make the best possible choice for the client when selecting financial instruments. Where appropriate, Tramondo funds are used in the asset management mandates.
